

VECTOR-HD Pump

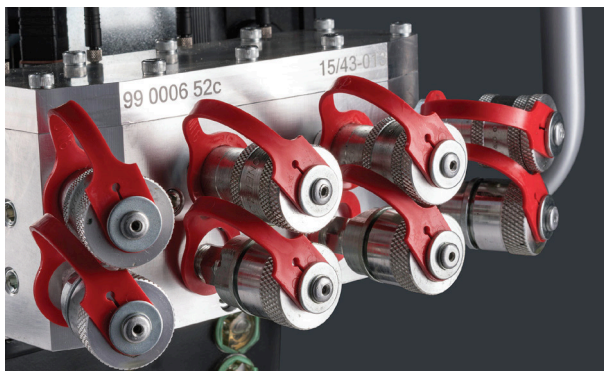

The world's most advanced hydraulic power pack. The first pump to offer LCD pendant control and automated regulation, HYTORC is taking industrial bolting to the next level. With the Vector Series pumps, industrial bolting has become more intuitive and smarter than ever before.

Pump Features

- World's first four-port fully automatic pump with completion detection.
- World's fastest fully automatic pump with 3-stage high speed flow.
- User-friendly digital remote stores specifications for all HYTORC tools.
- Gauge-free operation - simply select your tool and desired torque output on the remote.
- Lightweight, ergonomic design for portability and convenience.
- Option: Job documentation via USB storage device or bluetooth connection.

The Hydraulic Power System operates at a very quiet 69dB. The pumps are air-cooled and designed to handle extremely heavy workloads - making overheating a thing of the past. A compact design with a eight liter tank alleviates weight restrictions and offers the operator efficient mobility. The simple calibration setup and automated bolting process reduce overall job time and improve efficiency.

Four-port fully automatic pump with completion detection

User-friendly digital remote stores specifications for all HYTORC tools.

Data Recording

Reservoir Capacity
8 L

Stages
3

Weight
36 Kg

Technical Data

Max. oil flow: 70 bar	8,0 l/min
Middlepressure oil flow: 300 bar	1,6 l/min
Highpressure oil flow: 700 bar	0,9 l/min
Amperage	9 AMP/230V

Main Features

- Protective Caging
- Equipment with Oil Cooler
- 4,5 M Digital Remote Control
 - option: 10 M extended Remote Control
- 4,5 M Twin-Line Hose Assembly
