

jGun DIGITAL Pneumatic Torque Tool

The jGun DIGITAL from HYTORC is the world's first torque-adjustable pneumatic multiplier with a digital readout and FRL-free operation. Unlike other systems that require a separate filter, regulator and lubrication system between the air line and the tool, the patented design of the jGun DIGITAL eliminates the need for this add-on for the highest level of portability and convenience.

DIGITAL READOUT

The jGun DIGITAL is the world's first torque-adjustable pneumatic multiplier with a digital readout and FRL-free operation. Unlike other systems that require a separate filter, regulator and lubrication system, the patented design of the jGun DIGITAL eliminates the need for this add-on for the highest level of portability and convenience.

BUILT-IN TORQUE ADJUSTMENT

The jGun DIGITAL is the first of its kind with an onboard air regulator for simple torque adjustment with a twist of the connector at the bottom of the handle. Especially convenient when switching from tightening to loosening, giving you the ability to quickly adjust to full power for fast and easy break-out.

INDUSTRIAL-GRADE MOTOR

The new motor featured in the jGun DIGITAL is a workhorse designed for heavy industrial use. With maximum power-to-weight ratio and a rugged corrosion-resistant design, this motor eliminates the need for separate air filters and lubrication systems, making the jGun DIGITAL the most portable air powered torque gun on the market.
